The authors regret an error in Table 2 of the original article. Specifically, the false negative (FN) count for POCUS in diagnosing fetal cardiac activity (FCA) was incorrectly reported as “12” instead of the correct value of “8.” This error was a typographical oversight introduced during the final revision of the table. The results, statistical

analyses, and conclusions of the study remain accurate and unaffected by this typographical error, as they were based on the correct original data.

The authors would like to apologise for any inconvenience caused.
